António Pires dos Santos

Frontend Web Developer

Aveiro, Portugal

Driven and creative web developer which enjoys working on ambitious projects that require the latest and best technology.

Experience (work experience and projects)

Web Developer at University of Aveiro   February 2019 - Present

Working in the reformulation and over-all update of the University's portal including a complete re-design and the implementation of the most appropriate technologies. Focusing mainly in the research and development of a visual and personalised content management service.

Kind   January 2019 - July 2019

This project was made at Pixels Camp in under 48 hours, we took on a challenge proposed by the Gulbenkian foundation, Hack For Good. Developed a Node Express.js API that would detect insults in chat messages.

Avocado   January 2019 - July 2019

Avocado is a management and planning platform of food safety audits and their resources. Development of a frontend dashboard using React with React-Redux and Redux-Saga.

YTRank.net   April 2017 - Present

A simple web-based youtube rank checker tool that has helped thousands of users find the ranking of any youtube video. Personal project developed over the years, learned Vue JS with it then decided to re-make it in React and GraphQL. Learn all about the story behind it at ytrank.net/whats-new .

Education

Master in Multimedia Communication (ongoing)   2018 - Present

University of Aveiro

The main objective of the Master's in Multimedia Communication is to reinforce the training of professionals in this area, specifically in the production of multimedia and communication tools and in the creation of digital, audiovisual materials.

New Communication Technologies   2015 - 2018

University of Aveiro

The undergraduate program in New Communication Technologies establishes as its main purpose the qualification of professionals in the area of technologically mediated communication.
